PRESS RELEASE

CarXPC™ Announces Launch of its Corporate Website

Troy, New York—August 3, 2004 CarXPC President, David Bonyng, along with VP of Operations, Jeffrey Cox, announced to company employees that CarXPC's website has been launched. The website is fully operational and the products are available for purchase at the CarXPC online store www.carxpc.com.

Mr. Bonyng noted "Our goal for commercialization was to have all components for the CarXPC product the absolute best available and fully tested prior to launch. The product is literally made from prime components selected from possibilities located throughout the world. Initially we are available to the retail market, while turning some of our marketing attention to specific "on road" business/commercial areas of opportunity."

"It was a long time in coming, and thanks to everyone's efforts, it's finally here" said Jeffrey Cox, VP of Operations.

About CarXPC, Inc.:

CarXPC, Inc. is the premier developer and marketer of "Microsoft Windows compatible" computers specifically and ergonomically designed for use inside motor vehicles: including consumer and commercial cars, vans, SUVs, RVs, and all types of trucks. Based in Troy, New York, the company is engaged in the development of Windows XP based computers specifically designed for in-vehicle use. The computer supports all of your Windows XP applications in addition to applications such as GPS navigation, wireless Internet access, remote control of base station computer, and support for nearly all digital media formats.
